**8 Great Reasons:  
Why **Prospero** is your  
Budgeting & Financial Reporting Solution**

1. As members of the original Microsoft FRx and Forecaster development, consulting and support teams, we've designed **Prospero** with an understanding of your current software investment. Our years of Forecaster, FRx and Management Reporter experience make us uniquely qualified to help you navigate the challenges replacing your budgeting and financial reporting solution.
2. **Prospero Budgeting** provides a powerful budgeting and planning solution that is fully-integrated with our sophisticated **Prospero Financial Reporting**.
3. The MSX Group offers comprehensive FRx-to-Prospero and Forecaster-to-Prospero migration paths, including implementation, report conversion, training, and support. We're with you every step of the way!
4. **Prospero** includes a host of maintenance-saving tools, including export to Excel and PDF. Creating new, dynamic reports is as easy as changing the date, and within Prospero, you can publish reports to preserve a "snapshot-in-time" of your report and its data.
5. MSX Group **Prospero** uses simple, yet powerful, building block elements for creating sophisticated budgets and forecasts and boardroom-ready reports, charts and graphs. You're up-and-running quickly, accessing underlying report data via drill-down to transaction-level detail and easily creating budgets for analyzing your organization's performance.
6. Our robust and straightforward **Prospero** security allows you – not IT – to control who has access to your budgets, reports and data.
7. **Prospero** integrates with a variety of General Ledgers – including Microsoft GP – and we're adding support for more GLs every day, each utilizing our familiar and user-friendly interface.

8. MSX Group **Prospero** integrates directly with your General Ledger, while also allowing you to bring data in from other data sources such as Microsoft Forecaster and Excel.
