# PROSPERO<sup>®</sup>

FINANCIAL REPORTING, BUDGETING & ANALYSIS

- MSX Group® was started in 2009.
- Founding members of MSX Group were all originally with Microsoft® Corporation, Great Plains Software® or FRx® Software Corporation handling the support, services and training for Microsoft® Management Reporter, Microsoft Forecaster® and Microsoft FRx®.
- Each MSX Group team member has 20+ years of experience with financial reporting and budgeting software solutions.
- Prospero has been developed as an all-in-one software solution to replace Management Reporter, FRx and Forecaster.

Your expert resources for financial reporting,  
budgeting and analysis

Noah Moseley  
[noah.moseley@MSXGroup.com](mailto:noah.moseley@MSXGroup.com)

**PROSPERO** is a financial reporting and budgeting solution allowing organizations to quickly and accurately generate their financial statements and budgets or forecasts in one easy-to-use program:

- Financial Reporting
- Dynamic Drilldown to Account and Transaction Level Details
- Budgeting and Forecasting
- Interactive Charts and Graphs
- Migration Available from Management Reporter, FRx and Forecaster

# REPORTING

- Build and generate your financial statements:
  - Income Statements
  - Balance Sheet Statements
  - Cash Flow Statements
  - Trial Balance Statements
- Include Account and Transaction Details
- Built-in Dynamic Charts & Graphs

**ABC Company

# Prospero Reporting & Prospero Budgeting

11:00 AM EST

**Prospero:** Introduction

12:15 PM EST

**Reporting:** Introduction

1:30 PM EST

**Reporting:** Advanced

2:45 PM EST

**Budgeting:** Introduction

4:00 PM EST

**Budgeting:** Advanced

## Spring 2024

## Common Budgeting Challenges with Excel:

- Too many spreadsheets, formulas, broken links
- Too much time to set up
- Difficult to collaborate without security and audit trail
- Data integrity, version control, consolidation

## Prospero Solutions:

- **Quicker Budgeting Cycle**
  - Minimal year-to-year setup
  - No broken links, formulas, or separate, disparate spreadsheets
  - Powerful & easy rollups for quick consolidation or reorganization
- **Budget Control**
  - Centralized setup stored in database
  - Easy to Use! Microsoft Office navigation, Spreadsheet design

# Prospero vs Management Reporter, FRx and Forecaster

	Current Challenge	Prospero Solution
<b>1. New Features &amp; Development</b>	Microsoft FRx, Forecaster & Management Reporter are no longer being developed and will not be supported by future GL releases.	Prospero receives ongoing development with bug fixes and new features added regularly for current and future GL releases.
<b>2. Security Setup</b>	Security is scattered across multiple applications (Report Designer, Forecaster, Report Library folders, separate Trees and Tree units).	Prospero offers a centralized security model that controls access for all reports and budgets.
<b>3. Security Roles</b>	MR and FRx only have four (4) roles which cannot be modified.	Prospero allows you to define as many roles as you need, and they are all customizable.
<b>4. Application</b>	MR/FRx/FC are two separate applications and processes, each requiring their own setup and maintenance for Lines, Columns, Trees, Reports and Budgeting elements.	Prospero consolidates all definitions into a single application and process so that Lines, Columns and Trees can be shared between reporting and budgeting.
<b>5. Line Set Maintenance</b>	Line maintenance is very difficult, time consuming and error prone when adding new Segment ID's and Accounts.	Prospero offers little-to-no maintenance options using Summary Segments and Accounts and the Expand feature to bring in and display all accounts in a range.
<b>6. Report Output</b>	All MR reports must go directly to the Viewer with no other direct output options.	Prospero offers multiple options including Workspace, Excel, PDF and Printer.

# Prospero vs Management Reporter, FRx and Forecaster

	Current Challenge	Prospero Solution
<b>7. Graphing</b>	MR can graph only a single row or column with no drill down. FC has no charts or graph options.	All report data in Prospero may be displayed as charts or graphs and Prospero's graphs and charts provide dynamic drilldown for analysis.
<b>8. Drill Down Order</b>	MR does not allow different drill order unless separate trees and reports are used.	Any report can be changed on the fly to drill into different GL segment order.
<b>9. Report Library</b>	Every report generated is stored in the Library and is available for end users to see.	Only Published Reports are stored in the Library and viewable by end users.
<b>10. Statistics</b>	MR/FRx are read-only applications with no way to store statistics outside of the GL other than Excel spreadsheets.	Prospero has its own data warehouse (included at no extra charge) for storing non-GL data and statistics for reporting and budgeting.
<b>11. User Able to Customize</b>	Existing MSFT products have little to no way to customize based on user preferences.	Prospero has many options to tailor end user experiences, including Quick Launch of common reports, windows settings, toolbars and short cuts, colors, etc.
<b>12. Price</b>	Other 3 <sup>rd</sup> party software solutions can be pricey with recurring charges and add-ons with long implementations.	Prospero is a fraction of the cost with same robust reporting and budgeting AND short implementation time! As little as \$49/month for 1 power user reporting!

## Prospero Differentiators

1. A single application for reporting and budgeting which avoids double the work required when using two separate reporting & budgeting applications.
2. FRx and MR Report Conversion! Convert your existing reports! With other products, you must create all reports from scratch which is a HUGE cost and time commitment.
3. Migration path from Forecaster to Prospero! Save time and money by not having to recreate your Input Sets and reports from scratch.
4. Familiar Building Blocks (Rows, Columns and Trees) that are interchangeable! You do not have to learn a new interface. With Excel-based products, you do not have the ease, visibility and ability to re-use rows, columns and trees in report and budget designs, making ongoing maintenance more difficult and time consuming.
5. Purpose-built budgeting with details for HR, Capital, Revenue, Line Items and Audit History. Prospero has built-in features for calculating depreciation, tax withholdings, FICA caps and benefits. You do not have to build from the ground up like other Excel-based budgeting solutions.
6. Robust and flexible drill-down and drill order to the account and transaction level that other expensive products do not do as robustly and easily.
7. Dynamic charts and graphs with drilldown through all segments/dimensions and able to nimbly change the drill order as needed.
8. Report Collections to group and run multiple reports at once.
9. Expanded Summary Rows to reduce and/or avoid report maintenance when adding new accounts, locations, departments and other GL segments.
10. Easy, graphical segment trees for powerful reporting with little or no maintenance when built using ranges and wildcards. Summary trees offer dynamic drill down power and sub-totaling for reports to help analyze data.
11. Data warehouse for GL and Non-GL data, statistics and budgets!
12. Our experienced staff has worked with MR/FRx/Forecaster and other BI applications for 20+ years, helping make the transition to Prospero painless.
13. Great value and ROI: Do not overpay for software licenses and longer, costlier software implementation services. Prospero is a fraction of the cost of competitors in BOTH license fees and implementation time and cost.
14. There is a **FREE trial version of Prospero using your data, reports and budgets** to help you evaluate the power, ease and economical migration from MR/FRx/Forecaster to Prospero!

# R E C A P

## REPORTING

- Report Definitions
- Easy Analysis with Changeable Drill-Down Order
- Dynamic Charts and Graphs
- Published Reports
- Report Collections
- Generate Directly to Excel, PDF or Printer

## BUDGETING

- Main Input Screen
- Line Item Details
- Annotations
- Account History
- Human Resource Budgeting
- Capital Budgeting
- Instant Consolidation

**Migration Options Available for  
Management Reporter, FRx and Forecaster.  
Save Time & Money. Don't Start from Scratch.**

The background of the image shows a group of four business professionals in an office setting. They are gathered around a desk, looking at a laptop. The MSX Group logo, which consists of a stylized orange and yellow icon followed by the text 'MSXGROUP', is visible in the upper left corner. The overall scene is dimly lit, with a dark overlay on the right side where the text is placed.
